

Paulding County School District

Written Description of Thinkgate

Thinkgate is an online platform for tracking district and classroom assessments, standards, and communication. The Thinkgate Platform connects information from different systems together to give educators a more complete perspective, delivered through an intuitive, easy-to-use dashboard.

Formative Assessment Solution

Assessment is a key component in gathering pertinent student data and in measuring the success of curricular and instructional goals. Teachers and administrators use the assessment program for producing meaningful results.

Thinkgate facilitates the creation of a customized assessment program that supports the teacher's efforts to individualize instruction for every student while ensuring that goals and objectives are being met district-wide.

- Rubric Library

Item Banks

- Multi-District and State Shared Collaborative Bank
- District
- School
- Teacher

Progress Monitoring Solution

The Progress Monitoring Solution turns disparate data into information that can be trended and diagnosed to make adjustments in the education process. And with better information comes better decisions.

With Thinkgate's Progress Monitoring Solution, there is a powerful data warehouse with a robust analytics engine that maximizes our ability to easily view and generate reports at the district, school, teacher, class, student, demographic, AYP subgroup and state-standard levels.

These easy-to-read, interactive reports invite deeper analysis and data utilization by teachers and administrators alike for adjusting and improving student instruction.

State Analysis

- Results on a variety of state-specific assessments
- Imported from state electronic files

Advanced Analysis

- Administrative reporting and analysis
- Teacher reporting and analysis
- Comparative Reporting
- Multi-year analysis
- Report Engine
- Report Builder
